

The Whistle

FHEA

VOLUME XXIX, NUMBER 2

SUMMER 2013

Greetings all!

This year is passing so fast I cannot believe it's July already.

At the beginning of this year I was honored to have been nominated by our Board of Directors to represent FHEA for the ASHE Emerging Leader Award. On June 13th I was notified that I have been selected to receive the 2013

ASHE Region 4 Emerging Leader Award. This is indeed a great honor and I am proud to represent

The President's Corner

DAVID KOVACS, CHE, PRESIDENT

FHEA and ASHE Region 4. I will be receiving this award at the Annual ASHE Meeting in Atlanta July 21st through 24th. I hope to see you there!

The 2013 Spring Meeting was held May 10th at the Hilton Resort in Daytona Beach. The Spring Meeting Golf tournament was held on the 9th and was a huge success. Although I was not able to play due to a recovering fractured wrist, I heard from many players that it was a great event and fun was had by all. A big "Thank You!" to all the supporting members who provided sponsorships that made this event possible. Another thank you to Greg Hodgson who once again coordinated another great golf outing. Way to go, Greg!

The Spring Meeting was a success as well. We had a great lineup of educational presentations and table top exhibitors. And lunch was outstanding.

Another big "Thank You" to the Gold, Silver and Bronze sponsors and the table top exhibitors who helped make this meeting possible. This meeting was strongly attended as well. It was great to see everyone there.

As I have indicated, one of my main focuses as State President is to build our membership. We are working to set up a State Membership Committee. Lily Salkoff-Piner (Petroleum Recovery Services), who offered ideas for a coordinated outreach effort by supporting members to healthcare facilities not currently represented by the FHEA, has graciously stepped up to chair this committee. Lily, Alethea

and I have met to discuss and plan how to structure the committee and its activities. We have only just begun but have a lot

of great ideas not only for increasing membership, but improving member retention through our district meetings, some of which have already been implemented and shown to be very positive in District 2. Thanks to Supporting Member Ed Varnes with Sauer Incorporated, who was instrumental in providing ideas and pointing us in the right direction. It is my goal to present an outline of the program at the next board meeting and if approved share it with all districts. I am very excited about this program as it has great potential to grow our membership and make us stronger than ever. That board meeting will be held in Destin on August 9th where we will also tour the venue for the 2014 Spring Meeting.

I hope you all have a great summer and again I hope to see you in Atlanta!

50th ASHE Annual Conference & Technical Exhibition

July 21-24, 2013 | Atlanta, Georgia

ASHE, the national association of which the FHEA is an autonomous chapter, is celebrating 50 years of “education, networking, and advancement for health care facility management professionals.” The four day conference taking place this year in Atlanta, Georgia on July 21-24, will kick off with a day devoted to the Chapter Leadership Forum and Awards, during which our state president, **David Kovacs, CHE**, will receive the Region 4 Emerging Leader Award.

The three days that follow will include 40 peer-reviewed sessions, including Joe Flower, renowned health care futurist. We note with particular interest that FHEA’s own **Donald Paschal, CPMM, CHFM**, Director of Corporate Engineering at Orlando Health will be presenting twice, on Monday and

*The Florida Healthcare Engineering Association extends its congratulations to **David Kovacs, CHE** in being named **ASHE’s Region 4 Emerging Leader***

again on Wednesday. Monday’s topic is “Using Defensible Data to Make the Case for Facility Funding,” to acquaint facility directors with objective methods to secure funding for deferred maintenance and

renewal projects. Another FHEA member, **Kirk Dickson, CHFM** will be presenting on Monday with TLC’s Michael Sheerin on hybrid heating at Dickson’s facility, Nemours Children’s Hospital.

Our thanks to United Laboratories for sponsoring this issue of the Whistle!

United Laboratories, Inc. Responsible Innovation™

Since 1964 United Laboratories has been a leader in providing innovative products to help with the maintenance, repair and operations of their broad customer base. Following the philosophy of Responsible Innovation™, United has led the industry with the broadest line of bio-based, Earth Smart® certified products that are formulated to work better than the chemistry of old, while being safer for both the users and the environment.

When it comes to maintaining drains and grease traps, United is the “go-to” company for both solid and liquid forms of bacteriological and chemical solutions. Having led the way with bacterial block treatments, United has recently pushed that technology generations further ahead with their patent-pending Inter-Core Technology. Most Inter-Core Technology blocks, feature specialized blends of bacteria, that include patented strains, at a per gram count that is higher than you’ll find anywhere else. Couple the Inter-Core Technology with the all new patent-pending JET PAK Dispensing System for one of the easiest, most effective maintenance systems in the market. If you prefer working with liquid maintenance products, United offers several maintenance systems that will keep you in compliance with local regulations.

For a solution that will help to save money with Cooling Towers and Industrial Water Treatment, United offers their Cycle Smart products. Cycle Smart offers a way to control scale, biomass and corrosion that limits efficiency and leads to costly repairs. Putting a Cycle Smart program in place works to improve efficiencies and save you money on water, energy, labor and repairs with a program that is safer in use for the environment.

While quality of product is top priority at United, so is servicing their customers. In addition to United’s vast product offering of over 400 products, their customers have access to the assistance of specialists in the field as well as an internal Technical Support Staff. Working hand-in-hand with customers, United works to find the most effective and efficient solutions to meet their needs.

As a long-time supporter of numerous hospital groups, United also considers it an honor to be a supporting member of the Florida Healthcare Engineering Association.

For more information on United Laboratories and their products, visit www.unitedlabsinc.com. For your local area specialist contact one of the following:

Register today for the FHEA Annual Meeting
www.ahcaseminar.com

FHEA 51st Annual Meeting & Trade Show
29th Annual AHCA Seminar
October 7-9, 2013 Hilton Orlando Orlando, Florida

The Florida Healthcare Engineering Association's 51st Annual Meeting and Trade Show will be held Monday, October 7, through Wednesday, October 9, 2013, at the Hilton Orlando. For the 18th consecutive year, our annual meeting is being held in cooperation with the Florida's Agency for Health Care Administration (AHCA), the Office of Plans and Construction. By combining the two meetings, we expect to have well over 1,100 attendees at this important event.

AHCA's two days of presentations on Monday and Tuesday, Oct 7-8, will focus on *The Future of Health Care Design & Construction*. The main speaker sessions will be complemented with breakway sessions in Architecture, Mechanical Engineering, and Electrical Engineering, as well as important Healthcare Facility Engineering sessions on both days regarding design, code, and construction requirements for healthcare facilities. As in the past, AHCA architect and engineer reviewers as well as Fire Protection Specialists will be in attendance. This conference presents a great opportunity for you to meet and get to know these individuals who visit your facilities throughout the year, and to learn alongside them.

FHEA's educational session will take place Wednesday, Oct. 9. The theme of this meeting is *Coping with the Changes in the Environment of Care*. As always the FHEA Board of Directors has put together a program designed to help our members stay current on the important codes and standards governing healthcare facilities.

Register for any portion of this joint conference online at www.ahcaseminar.com. You can also make your hotel reservations here. Full programs details for both AHCA and FHEA are posted on this site. Payment can be completed with credit card online, or if you prefer you can register, choose to pay by check and print out the registration and mail it in. If you have any questions about registering contact the FHEA office at 407-332-7767 or fhea@earthlink.net
